About DoubleLine

Founded in 2009, DoubleLine's portfolio managers have worked together for an average of 17 years and have over 23 years average industry experience.

Investment Objective

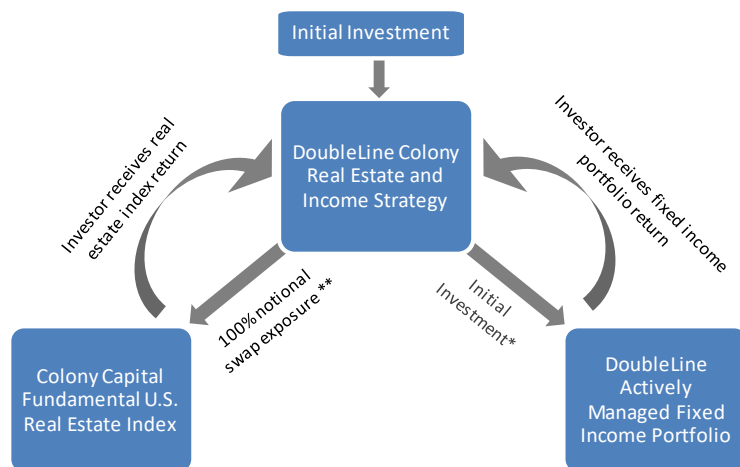

The Fund's investment objective is to seek total return which exceeds the total return of its benchmark over a full market cycle.

Investment Approach

The Fund will seek to use derivatives, or a combination of derivatives and direct investments, to provide a return (before fees and expenses) that approximates the performance of the Colony Capital Fundamental U.S. Real Estate Index. The Fund will also invest in a portfolio of debt securities to seek to provide additional long-term total return.

Investment Philosophy

Maintain a core portfolio of debt instruments that focuses on global fixed income sector rotation while simultaneously obtaining exposure to U.S. REITs through the Colony Capital Fundamental U.S. Real Estate Index. The structure of the DoubleLine Colony Real Estate and Income Fund allows investors to simultaneously access returns of the real estate equity markets and fixed income markets. By using an equity index swap, \$1 invested in the strategy provides approximately \$1 of exposure to each market.

* A portion of the Initial Investment may be pledged as collateral under the swap.
 ** Market fluctuations may preclude full \$1 for \$1 exposure between the swaps and the fixed income portfolio.

Sector Allocations are subject to change at any time and should not be considered a recommendation to buy or sell any security. Past performance does not guarantee future results. Mutual fund investing involves risk; Principal loss is possible.

Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investments in lower-rated and non-rated securities present a greater risk of loss to principal and interest than higher-rated securities. Investments in Asset-Backed and Mortgage-Backed Securities include additional risks that investors should be aware of such as credit risk, prepayment risk, possible illiquidity and default, as well as increased susceptibility to adverse economic developments. The Fund may use certain types of investment derivatives. Derivatives involve risks different from, and in certain cases, greater than the risks presented by more traditional investments. Derivatives may involve certain costs and risk such as liquidity, interest rate, market, credit, management and the risk that a position could not be closed when most advantageous. Investing in derivatives could lose more than the amount invested. The Fund may also invest in securities related to real estate, which may decline in value as a result of factors affecting the real estate industry. Investments in foreign securities include the risk that the Fund's investments will be affected by political, regulatory, and economic risks not present in domestic investments.

Index Disclosure

Dow Jones U.S. Select REIT Index - The Index tracks the performance of publicly traded REITs and REIT-like securities and is designed to serve as a proxy for direct real estate investment, in part by excluding companies whose performance may be driven by factors other than the value of real estate.

Colony Capital Fundamental U.S. Real Estate Index – The Index is a rules-based index that incorporates the fundamental criteria described below originally developed by Colony Capital, Inc. The Index is rebalanced and reconstituted quarterly by applying a systematic methodology to the universe of real estate investment trusts.

It is not possible to invest directly in an index.

Definition of Terms

Active Share - A measure of the percentage of stock holdings in a manager's portfolio that differs from the benchmark index.

Agency - Mortgage securities whose principal and interest are effectively guaranteed by the U.S. Government agency including Fannie Mae (FNMA) or Freddie-Mac (FHLMC).

Below Investment Grade - Refers to a security rated below investment grade. These securities are seen as having higher default risk or other adverse credit events, but typically pay higher yields than better quality bonds in order to make them attractive. They are less likely to pay back 100 cents on the dollar.

Credit Distribution is determined from the highest available credit rating from any Nationally Recognized Statistical Rating Agency ("NRSRO", generally S&P, Moody's and Fitch). DoubleLine chooses to display credit ratings using S&P's rating convention, although the rating itself might be sourced from another NRSRO. In limited situations when the rating agency has not issued a formal rating, the rating agency will classify the security as unrated.

Duration - A commonly used measure of the potential volatility of the price of a debt securities, prior to maturity. Securities with a longer duration generally have more volatile prices than securities of comparable quality with a shorter duration.

Fixed Income Sector Allocation - The figures shown for the fixed income sector allocation represent the relative net assets invested in the displayed categories of fixed income and cash only.

Investment Grade - Refers to a bond considered investment grade if its credit rating is BBB– or higher by Standard & Poor's or Baa3 or higher by Moody's. Ratings are based on a corporate bond model. The higher the rating the more likely the bond will pay back par/100 cents on the dollar.

Market Cap - The market price of an entire company, calculated by multiplying the number of shares outstanding by the price per share. **RMBS** – Residential Mortgage-Backed Securities.

Weighted Average Life (WAL) – The average number of years for which each dollar of unpaid principal on a loan or mortgage remains outstanding.

Neither Barclays nor the Index Sponsor has any obligation to take the needs of the Fund into consideration in determining, composing or calculating the Index.

Barclays' indices are administered, calculated and published by the Index Sponsor. The Index Sponsor role is performed by Barclays Index Administration ("BINDA"), a distinct function within the Investment Bank of Barclays Bank PLC. As the administrator of the Barclays family of indices, BINDA operates independently from Barclays Investment Bank's sales, trading, structuring and banking departments. Notwithstanding the foregoing, potential conflicts of interest may exist where: (i) Barclays acts in multiple capacities with respect to a particular Barclays index, including but not limited to functioning as index sponsor, index administrator, calculation agent, licensing agent, and/or publisher; (ii) sales, trading or structuring desks in Barclays Investment Bank launch products linked to the performance of a Barclays index, which are typically hedged by Barclays' trading desks. In hedging an index, a trading desk may purchase or sell constituents of that index. These purchases or sales may affect the prices of the index constituents which could in turn affect the level of that index; and (iii) Barclays may use price contributions from trading desks in Barclays Investment Bank as a pricing source for a Barclays index. Barclays has in place policies and governance procedures (including separation of reporting lines) that are designed to avoid or otherwise appropriately manage such conflicts of interest and ensure the independence of BINDA and the integrity of Barclays indices. Where permitted and subject to appropriate restrictions, BINDA personnel regularly interact with trading and structuring desk personnel in Barclays Investment Bank regarding current market conditions and prices although decisions made by BINDA are independent and not influenced by trading and structuring desk personnel. Additional information about Barclays indices together with copies of the BINDA IOSCO Compliance Statement and Control Framework are available at: <https://index.barcap.com/Home/BINDA>.

The Index Sponsor is under no obligation to continue the calculation, publication and dissemination of the Index or the level of the Index. While the Index Sponsor currently employs the methodology ascribed to the Index (and application of such methodology shall be conclusive and binding), no assurance can be given that market, regulatory, juridical, financial, fiscal or other circumstances (including, but not limited to, any changes to or any suspension or termination of or any other events affecting any constituent within the Index) will not arise that would, in the view of the Index Sponsor, necessitate an adjustment, modification or change of such methodology. In certain circumstances, the Index Sponsor may suspend or terminate the Index.
